very nice visual novel game with good mystery story line. good game good memorys just fix the multiplayer and i would be awesome. has potential. needs more cultures as well. hope it never gets abandoned :). Point Perfect seems like a unique concept at first, and it is.

Thing is though, this seems like a game thats worth maybe one dollar. Not five.

Only buy this on sale.

6/10. I still have my disc for the original Cultures game and seriously love the whole series. I'm so glad there's now a legitimate way to get Northland and 8th Wonder in Australia because they were never released here. I played 8th Wonder last night and got sucked into it again for 3+ hours. The games are sort of a mix between age of empires, the sims, banished and anno. There's production lines but everything is a little more personal as you have to sort of micromanage the Vikings, including telling them to get married, assigning them jobs and dwellings and telling them to have children etc. Unlike Anno there is a little bit of fighting with several types of 'soldiers' etc but I tend to play on Free Play and just focus on building big civilizations. I still like the graphics style now and the music/sounds aren't too bad either. Overall still love the games and look forward to playing more!

Everything I ever asked for in one game. Pure genius. Pure fun. Worth it.. Game is still alpha and has some issues, but the developer is committed and very responsive. Haven't spend a lot of time in game yet, but from what I've played it seems fun.. Worst keyboard config ever. Worth it for RougeLight alone!. Entertaining and funny at first it becomes boring after 5 minutes of gameplay. Just because whatever you do.... ya die and that's all.

Expected more freedom and exploration.

The style is good. The contents - not so much.

. Unstable physic theory. Nice but HARD AF
